 - Torque main bearing caps as per specifications
- Connecting Rods and Pistons
 - Fit piston rings and install pistons into liners
 - Attach connecting rods to crankshaft with proper bearing shells
 - Torque connecting rod bolts to specified values

- Cylinder Head and Valvetrain

- Install valve guides, valves, and springs
- Seat valves properly and check clearance
- Mount cylinder head, ensuring gasket proper placement
- Torque cylinder head bolts in sequence

- Fuel Injection System

- Install injectors, pumps, and piping
- Bleed fuel system to eliminate air

- Cooling and Lubrication Systems

- Mount water pumps, thermostats, and intercoolers
- Connect oil and coolant lines
- Fill with appropriate lubricants and coolants

- Ancillary Components

- Attach turbocharger, piping, belts, and electrical connections
- Reinstall engine covers and protective guards

Final Checks

- Verify all torque settings
- Check for loose or missing parts
- Conduct visual inspection for cleanliness

Testing and Commissioning

Post-assembly testing is essential to ensure the engine functions correctly before returning to service.

Initial Start-Up

- Fill with fresh oil and coolant
- Prime fuel system if necessary
- Start engine cautiously, observing for abnormal noises, vibrations, or leaks

Operational Testing

- Monitor parameters: oil pressure, coolant temperature, exhaust gases
- Check for leaks, vibrations, or irregularities
- Conduct no-load and load testing as per manufacturer guidelines

Performance Tuning

- Adjust fuel injection timing and pump settings if required
- Verify emission levels and combustion efficiency
- Record performance data for future reference

Documentation and Handover

- Maintain detailed overhaul reports
- Update maintenance records
- Train operators on post-overhaul operational procedures

Post-Overhaul Maintenance Tips

Maintenance after overhaul extends the lifespan and maintains optimal engine performance.

- Regularly check and change engine oil and filters
- Monitor coolant and fuel quality
- Keep a log of operating hours and performance trends
- Schedule periodic inspections for early detection of issues
